COOKIES THAT UAB „Pirma sesija“ USES

WordPress uses the cookie `wordpress_[hash]` to store the authentication details on login. The authentication details include the username and double hashed copy of the password. However, this usage of the cookie is limited to the admin console area, the backend dashboard of the website.

The cookie `wordpress_logged_in_[hash]` is used to indicate when you are logged in, and who you are. This cookie is maintained on the front-end of the website as well when logged in.

Here `[hash]` represents the value that is obtained by applying a specific mathematical formula applied to the username and password. It is to ensure that the input values are safe, and no one can access these data using the cookies as it is difficult to ‘unhash’ the hashed data.

Cookie `PHPSESSID` preserves user session state across page requests and expires after the session.

WordPress also sets a cookie named `wordpress_test_cookie` to check if the cookies are enabled on the browser to provide appropriate user experience to the users. This cookie is used on the front-end, even if you are not logged in.
