

Dr. Debora Severo physiotherapist and osteopath as well as expert in the application of laser therapy and trainer.

She has worked and still works with amateur and professional athletes including the Australian national volleyball team, the Italian national under 23 road cycling team , basketball and skiers, the athletes of the Olympics in Turin 2006, running ultraracer and ultraracer cyclists, tennis and paddle players and has recently returned from the French Handikart championship where she provided in-race and post race assistance to a disabled racer. She is mainly involved in the study of posture and analysis of athletic gestures in the field of prevention and treatment.

The use of K-laser therapy in sports has enabled her to greatly optimize results especially on high level athletes.
