

DR. KRISTA TERZIEVA

'Initiation of T2 patients/Empowering patients to accept insulin treatment'

SOFIA, BULGARIA

EDUCATION

2015 – 2021
Medical doctor
Sofia University "St. Kliment Ohridski"

2010 – 2015
High school graduate
High School of Mathematics and
Natural Sciences " Nikola Obreshkov"

WORK EXPERIENCE

2022 – Now
Resident department of endocrinology and metabolic diseases, Tokuda hospital
I started my first of four years residency last year. During this one year I had the luck to dive into different endocrine pathologies. I encountered a variety of patients and working in a dynamic environment has taught me many lessons. I enjoy working in a team and love what I do.

2022 – 2022
Medical doctor emergency department, Tokuda hospital
After graduating from Medical School I started working as a medical doctor in the Emergency Department of Tokuda Hospital. I encountered a lot of complex patients and different medical cases, which gave me a broader view over medical pathologies.

2021 – 2022
Volunteer in Department of endocrinology and metabolic diseases, Tokuda hospital
I was a volunteer during my Medical school in the Department of Endocrinology and Metabolic Diseases in Sofia Tokuda hospital. I acquired a lot of first-hand experience in working with patients, general practice and working in a team.
